

Quality Assurance Analyst – Job Description

Summary: Minimum 3+ years of Relevant Experience as Quality Assurance Analyst in Agile Product environment for web & mobile centric products.

Job Type: Full-time

Responsibilities:

- Review functional and design specifications to ensure full understanding of individual deliverables.
- Backend database testing in MySQL environment including validating stored data, procedures, triggers and jobs
- Identify test requirements from specifications, map test case requirements and design test coverage plan.
- Develop, document and maintain functional test cases and other test artifacts like the test data, data validation, harness scripts and automated scripts.
- Execute and evaluate manual or automated test cases and report test results
- Comply with company's QA standards; provide daily test execution progress and technical reports on testing when required.
- Communicate defects and issues in a concise, timely and professional manner. Assist development with reproducing defects under investigations.
- Evaluate and report on the quality of software products and make recommendations for deployment.
- Work collaboratively among different teams to develop and improve QA processes
- Support other analysts by reviewing work and providing feedback when required

Required Skills:

- BS or BA degree preferred.
- 2+ years of relevant QA technical experience
- Intermediate level knowledge of the software development life cycle, testing strategies, tools and QA methodologies
- Expertise in database testing in MySQL Server environments including designing and manipulating test data, validating stored procs, jobs, triggers and replication
- Experience working with and testing web services – REST, SOAP, JSON

- Experience in documenting, tracking and escalating issues as appropriate, using JIRA

Nice to Have Skills:

- Proficiency with writing and has a solid understanding of SQL queries
- 2+ years of automation experience – preferable with selenium
- 1+ years large enterprise or e-business systems experience
- Experience with performance testing considered an asset.
